### **Kabana Crème™: A Serious Natural Moisturizer for Seriously Dry Winter Skin Conditions**

Boulder, Colorado. January 10, 2006. Kabana Skin Care's Kabana Crème™ Ultra Emollient Moisturizing Crème replenishes the moisture levels and structural integrity of skin damaged by the cold and dry winter conditions as are prevalent in many parts of the country. Kabana Crème™ contains completely natural and sustainable skin care ingredients and was designed and developed by Erik Kreider, MS MBA, a former dermatology pharmaceutical scientist, in Boulder, Colorado, where the extremely dry winter climate routinely leads to cracked, flaky and painful skin conditions including eczema. The secret to Kabana's effectiveness lies with the formula's superior emollient ingredients that mimic our body's innate moisturizing system. Kabana replenishes these critical moisturizers that are normally depleted by winter weather conditions and normal, enjoyable winter activities such as taking hot showers and bathing with soap. Using Kabana on a daily basis prevents dryness and cracking by rejuvenating the skin's ideal moisture levels, and is a quick, pleasurable addition to personal care activities.

Kabana Crème™ is not only a superb moisture maintenance product, but also heals dry, winter-damaged skin unlike other products currently on the market due to its rich, skin-cell nourishing essential fatty acid and antioxidants, without being too greasy. It should be used wherever damage typically occurs, such as on hands, elbows, feet and other particularly winter-sensitive areas, yet also provides extra comfort when used as a body crème, and is excellent for massage. Apply Kabana Crème™ at night before bed for best results.

Kabana Crème™ contains Kabana's [Simple Seven™](#) natural ingredients which are easy to understand by reading the label - so you don't have to have a PhD in chemistry to feel secure about what you're putting on your skin. A new addition to the ingredient list is soy lecithin which provides additional emollient and antioxidant properties, and maintains a thoroughly creamy and stable product that will satisfy your desire for a luxurious treatment until it runs out.

Kabana Skin Care is based in the center of the natural products world – Boulder, Colorado, and can be accessed on the web at <http://www.kabanaskincare.com>. Its labs are within the old Amgen building, now primarily Array Biopharmaceuticals, at 1865 33<sup>rd</sup> Street.

Kabana Skin Care delivers superb and simple to understand rigorously natural skin care products designed to make its customers feel great in body and mind. Kabana's Precisely Natural™ skin care and sunscreen products contain no synthetic or petroleum-based chemicals. Its current product offering is comprised of four natural-flavor or essential oil-customizable lines – Kabana Crème™, an ultra emollient moisturizing crème with [Simple Seven™](#) ingredients; Green Screen™, a high performance broad spectrum UVA & UVB sunscreen; Liplovers™ Natural Lip Balm, and Sunsei™, a UV protective soap that delivers the same sunscreen while you bathe. All four are currently available at <http://www.kabanaskincare.com> and soon at select merchants in the Boulder-Denver area.

Love your skin. Kabana does.™
